

## Valliappa LAKSHMANAN

### Work Address

Radar Research and Development Division  
National Severe Storms Laboratory  
120 David L. Boren Blvd, Norman OK 73072-7327  
**Ph:** (405) 325-6569  
**Email:** lakshman@ou.edu  
**Web Page:** <http://www.cimms.ou.edu/~lakshman/>

### Home Address

612 Trisha Ln.  
Norman OK 73072  
**Ph:** (405) 364-2543

### Education

THE UNIVERSITY OF OKLAHOMA  
01/1999 – 10/2001  
Norman OK

Ph.D in Electrical and Computer Engineering. Research topic was the development of a texture segmentation algorithm whose outputs are nested partitions. This research enabled the development of a multiscale framework for the identification and tracking of storms at different scales.

THE OHIO STATE UNIVERSITY  
08/93 – 06/95  
Columbus OH

M.S. in Biomedical Engineering concentrating on image processing and computer vision and their applications to medicine.

THE INDIAN INSTITUTE OF TECHNOLOGY  
08/89 – 06/93  
Madras, India

B.Tech. in Electronics & Communications Eng.

### Employment History

CIMMS - OU & NSSL  
07/2002 – Present  
Norman OK

Research Scientist focusing on the development of machine intelligence algorithms that act on data from multiple sensors simultaneously and aid decision makers in forecasting severe weather and in effectively utilizing weather information.

CIMMS - OU & NSSL  
07/1995 – 06/2002  
Norman OK

Research Associate involved in the architecture and design of decision support systems for severe weather forecasting.

### Research & Development Experience

Architect of the Warning Decision Support System – Integrated Information (WDSS-II)<sup>1</sup>, a suite of multi-sensor machine-intelligence algorithms, tools and displays for research, weather analysis and severe weather warning decision-making. Uses C++, Java, J2EE, XML, CORBA, OpenGL and network programming on Linux and Windows (1999-)

Developed satellite multi-channel nowcasting technique under consideration for possible inclusion in GOES-R suite of algorithms (2008)

Designed and built an automated storm type classification system based on observed radar data (2007)

Designed and built geographic information systems (GIS) to display, monitor and disseminate warning and watch polygons (2006)

Designed and built a neural network to quality-control radar data (2003)

---

<sup>1</sup><http://www.wdssii.org>

Designed and built a 4-D multisource merging process to assimilate information from multiple sensors. (2002)

Technical lead on team integrating four-dimensional weather data with terrain information. Uses C++, OpenGL, Geographical Information Systems (2000–2002)

Researched and developed a multiscale framework that enables the identification and tracking of storms at different scales and makes it possible to devise algorithms to detect weather signatures in specific (relative) locations within a storm. (1999-2001)

Technical lead on team driving requirements and design to develop a set of interfaces (Common Operational Development Environment) to streamline the development and incorporation of new weather detection algorithms in National Weather Service Offices around the country. Uses C++, XML. (1999–2000)

Designer and technical leader in developing a system that will pull in data from all the radar in a region and combine them for visualization and algorithm processing. This project (“OPUP”), for the Air Force Weather Service, was first deployed in 1999-2000 and represented a significant advance over current visualization and radar data handling. Uses C++, XML and Oracle. (1998–2000)

*Short (less than 6 mo.) projects and work completed before 2000 omitted for space reasons. Please see publications for a more complete list of R&D work.*

## Grants

Co-PI, \$950K National Science Foundation grant, “Real-time Data Mining,” 2002-05. PIs: Theodore Trafalis, Michael Richman, myself, S. Lakshminarayanan, Patrick Skubic (NSF ITR 0205628, 2002-2007).

PI, \$900K National Science Foundation grant, “Integrating 3D Dynamic Meteorological Data and Algorithms into a Scalable Geospatial Framework,” 2000-04. Collaborators: William Ribarsky and Nicholas Faust of Georgia Tech Research Institute (NSF-CCF 9982299 for a total amount of \$1.9m, 2000-2004)

Co-PI, \$90K NOAA High Performance Computing (HPCC) Initiative, “Satellite Data Ingest and Visualization,” 2002. PIs: Robert Rabin (NSSL) and myself

Co-PI, \$67K NOAA High Performance Computing (HPCC) Initiative, “Real-time Distribution of WDSS-II Algorithm Information”, 2005. PIs: Russell Schneider (Storm Prediction Center) and myself

Co-PI, \$61K NOAA HPCC, “Four-dimensional Real Time CONUS radar products over the WWW”, 2007. PIs: Kurt Hondl (NSSL) and myself

Co-PI, \$57K NOAA High Performance Computing (HPCC) Initiative, “Enabling Communication of WDSS-II Severe Storm Data Over a Network,” 2004. PIs: Russell Schneider (Storm Prediction Center) and myself

Co-PI, \$30K NESDIS GOES-R Algorithms Working Group on Precipitation Nowcasting, 2007. PIs: Robert Rabin (NSSL) and myself

PI, \$30K USAID Disaster Mitigation and Recovery, 2007: Collaborators: Roy Bhomic (India Meteorological Department), Kurt Hondl (NSSL), Ming Xue (OU)

Co-PI, \$15K NASA Detection of Thunderstorms from Satellite Visible Imagery, 2007. PIs: Robert Rabin (NSSL) and myself

## Honors

Nominated by National Severe Storms Laboratory for Presidential Early Career Award for Scientists and Engineers (PECASE), 2006

NOAA Tech 2004 Award for Best Presentation in the category of Technology Transfer to Operations: "Real-time Dissemination of WSR-88D Radar Data over Internet2."

Nominated for the National Oceanographic and Atmospheric Administration (NOAA)'s Technology Transfer Award, 1998.

University Fellow, The Ohio State University, 1993-94.

Third in the IIT, Madras Department of Electrical Engineering (of 75 students: top 5%) in 1989-1993.

Named among the top 1% of Indian high school graduates in 1989.

## Panels, Invited Talks

- Organizer, 2008 Artificial Intelligence Competition<sup>2</sup> Jan 2008
- Member, American Meteorological Society committee on Artificial Intelligence<sup>3</sup> 2004-2009
- Reviewer for National Science Foundation Dynamic Data Driven Applications program, Journal of Applied Meteorology, Journal of Oceanic and Atmospheric Technology, Weather and Forecasting, IEEE Transactions on Geoscience and Remote Sensing, Advances in Atmospheric Sciences (China)
- Invited talks at
  1. To GOES-R satellite compression working group *An Overview of Radar Compression*, Aug. 2007, San Diego, CA
  2. Short course on Artificial Intelligence *Machine Learning Techniques on Spatial Grids*, Jan. 2007, Corpus Christi, TX
  3. NEXRAD Technical Advisory Committee Meeting (Information Briefing) *Quality Control Neural Network*, Oct. 12, 2005, San Diego, CA.
  4. Workshop on Severe Weather Technology for National Weather Service (NWS) Decision Making, organized by the NWS Meteorological Development Laboratory *WDSS-II: Aiding Severe Weather Forecasting*, July 13, 2005, Silver Spring, MD
  5. Int'l Conference on Advances in Pattern Recognition *Quality Control of Radar Reflectivity Data Using Texture Features and a Neural Network*, Dec. 13, 2003, Kolkata
  6. Los Alamos National Laboratory: *Fuzzy detection in Radar Images*, Jan 31, 1997
  7. University of Tulsa: *Electrical Engineering in Meteorological Research*, Oct 29, 1999
- One of two NSSL representatives in the working group on the Common Operational Development Environment. (1998–2000)
